

Table 6. Screening Criteria for Inclusion in the Cumulative Impact Analysis

Criteria	Discussion
Criterion 1: Is the action under active consideration?	Active consideration is defined as having current funding and staff support for planning and design.
Criterion 2: Does the action have recently-completed environmental documentation or are environmental documents in some active stage of completion?	This criterion is intended to eliminate actions that have been under consideration for a long period of time but for which no recent effort has been undertaken that would allow a reasonable projection for completion.
Criterion 3: Would the action be completed and operating within the timeframe being considered for CALFED (assumed to be 2020)?	
Criterion 4: Does the action, in combination with the CALFED action alternatives, have the potential to affect the same resources?	This criterion is intended to exclude actions that meet the other criteria, but that have little or no potential to result in cumulative impacts.
